Marina Blue

Pool Finish

First, Decide...

whether you would like the water in your pool to appear blue or green.

For Water that Looks Primarily Blue,

select a finish with white, blue or gray pigment.

For Water that Appears Green,

look for green, tan, brown or black pigment.

The Darker Your Finish,

the darker your pool water will be.

Water, the darker it will appear.

Water will seem lighter in shallower areas like steps, ledges, benches, and beach entries where the finish itself is more visible.

Beauty is More than Surface Deep

deep, rich water color in a pool without a deep end, select a darker pool finish.

Your pool's depth has a huge impact on the color of your water.

Your pool may actually appear deeper when you select a finish with a darker pigment.

Since your Pool Water will mirror its surroundings, many other factors wil impact water color.

- The design, shape, and depth of your pool
- The time of day and position of the sun
- Whether the sky is sunny, stormy, or overcast
- Your region of the country
- The chemistry of your water
- Landscaping, trees, bushes, & other foliage
- Colors in your home's exterior
